

LAND BRIDGE

EXPLORE THE HARDBERGER PARK LAND BRIDGE WITH THESE ACTIVITIES!

Grab-N-Go
Nature Lessons Kit

NATURE ART WITH A PURPOSE

Check out these structures that will help people to watch the birds and animals on the land bridge. They're decorated with images of the plants and animals from the park.

Brainstorm a structure or building that would be fun to have in your backyard or in your favorite nature spot.

What purpose will your structure serve? Will it benefit people, animals or plants, or will it have a creative purpose, like a fairy house?

Sketch out a picture of something you would like to create. Then, using a shoebox, construction paper, and markers, create it! Decorate it with things you find in nature, or draw designs that are inspired by nature!

INNATURE BY ASHLEY MIRELES

LIGHTBOX BY CADE BRADSHAW

LET'S TALK! Ask your friends and family:

- If you were an animal, why would you use the bridge instead of the road?
- How is the Land Bridge going to change the lives of the animals in the park?
- How will the Land Bridge affect the food, water, and habitat that animals need to survive?
- Which animals will adapt to the Land Bridge first? Use your Fauna Scavenger Hunt for ideas!

MAP READING

Maps can tell us all about how to get around! Hardberger Park's map shows us how to explore the park and the land bridge. Use your map and complete the challenges! While you're exploring, ask each other the questions in our "Let's Talk" section.

- Go from the Urban Ecology Center to the Land Bridge
- Go from the Land Bridge to Phil's Tree
- Go from the Bypass Trail to the Land Bridge
- Go from the Salado Classroom to the Land Bridge
- Go from the Oak Loop to the Land Bridge
